

Diane Barrett is a Certified Information Systems Security Professional, and Digital Forensic Certified Practitioner. She has been a forensic practitioner for a number of years and most recently served as the manager of research and training for Kroll's cyber and forensic division. She is the program chair for the Conference on Digital Forensics, Security and Law as well as a section editor for the Journal of Digital Forensics, Security, and Law.

Diane has been involved in collegiate-level forensic education through the development of curriculum and teaching at Bloomsburg University of Pennsylvania, American Military University, and the University of Advancing Technology.

She has been a volunteer for ISC2 since 2007 in the areas of item writing and review for the CISSP and ISSMP exams. She has co-authored several computer forensics books including Computer Forensics JumpStart, Computer Virtualization and Forensics, and Cybercrime and Cloud Forensics: Applications for Investigation Processes.

Diane is a PhD candidate at Northcentral University in the School of Business and Technology Management where her dissertation is on the application of current forensics investigative methods to cloud computing environments.
